References available upon request

Profile

I'm a game/level designer focused on building memorable player experiences through strong spatial design, iteration, and collaboration.

With a BSc (Hons) in Games Programming, I bridge design intent with technical understanding to support smooth implementation.

I'm always improving my craft through playtesting, feedback, and refining levels to guide, challenge, and reward players.

Work Experience

Abtos Covert — Game/Level Designer (2020–2026)

Released on **Steam**.

Game / Level Design work to support an immersive player experience

Projects

Entropy (GAME OF THE YEAR) | First-person, Puzzle

Worked on **level design**, puzzles, hub structure, light and overall pacing.

Nautilus | First-person, Atmospheric

Led the project while building levels and supporting implementation, **focused on pacing, navigation, and feel**.

Project Echo | First Person, Puzzle

Designed puzzle levels around cylinder-rotation and backtracking, teaching mechanics through clean, readable spaces.

Education

PlaygroundSquad (YH), Falun — Game Design, (09/2024–07/2027)

Middlesex University, London — BSc (Hons)
Games Programming
(10/2019–11/2022)
